Education

Bachelor of Science: Specialization in Computer Science; Minor in Software Engineering

London Ontario
Expected 2028

The University of Western Ontario

- Current GPA: 3.99/4.0, Dean's Honor List - 2024, 2025 Fall/Winter
- Western Scholarship of Excellence for entrance with top high school admission average (2024), Hugh G. White Memorial Scholarship for entrance with excellence in mathematics (2024)
- Relevant Coursework: Introduction to Software Engineering, Multimedia and Communication I, Fundamentals of Digital Marketing

Leadership & Work Experience

Synergy Centre - Dental & Healthcare

London Ontario
Date 2020 - Current

Medical Receptionist

- Responsible for managing the front-office and administrative tasks in a healthcare setting, serving as the first point of contact for patients and staff
- Key duties include scheduling appointments, managing patient records, handling phone calls and correspondence, processing payments, and ensuring the reception area is organized and welcoming

Projects

Punch-In Web Application - MarketDental (2025)

UI/UX Designer & Front-End Developer | Figma, Svelte, Tailwind CSS, JavaScript, HTML, Docker

- Executed the end-to-end design process, transitioning from hand-drawn low-fidelity wireframes into high-fidelity prototypes in Figma to streamline user clock-in workflows
- Applied CRAP principles (Contrast, Repetition, Alignment, and Proximity) to establish a clear visual hierarchy and improve the legibility of administrative dashboards.
- Co-developed a responsive front-end using Svelte and Tailwind CSS, ensuring pixel-perfect implementation of design mockups for a seamless mobile-first experience.

Throwback Mobile App Concept - Western Founders Network PDS (2026)

UI/UX Designer | Framer, User Research, Wireframing, Rapid Prototyping

<https://throwback.framer.website/>

- Designed a social reconnection mobile app from scratch during a 24-hour sprint, successfully presenting the final prototype the following morning.
- Conducted user research and built personas to guide the design of core features, including school-based friend recommendations, group chats, and event planning.
- Transformed low-fidelity wireframes into high-fidelity interactive mobile prototypes and built a custom presentation website, all using Framer.
- Awarded Most Accessible Design

Multiplayer Typeracer Game - Western University CS2212 (Intro to SWE) (2026)

Front-End Lead & UI/UX Designer | Java (Swing/AWT), Figma, Requirement Engineering

- Led the front-end development and UI/UX design for a LAN multiplayer typing game, establishing the core concept and tracking functional and non-functional requirements.
- Designed the complete visual identity of the game, progressing from initial sketches during team meetings to high-fidelity interactive wireframes in Figma.
- Coded the primary gameplay and game-over screens using Java Swing/AWT, implementing core mechanics like real-time text input, dynamic UI updates, and power-ups.
- Coordinated team operations by organizing meetings, acting as the primary liaison with teaching assistants, and refining the overall UI across all pages during final testing and debugging.

Rush Hour Puzzle Game - Personal Project (2023)

Co-Designer & Co-Developer | Java (Swing/AWT)

- Co-designed and developed a mobile-style puzzle game inspired by the classic board game Rush Hour, implemented entirely in Java
- Built the game interface and mechanics using Java AWT and Swing libraries to create interactive, visually engaging gameplay

Additional Info

- **Languages:** Java, Python, JavaScript, C, HTML, CSS
- **Frameworks & Libraries:** Svelte, React, Tailwind CSS, Java AWT and Swing
- **Tools & Platforms:** Figma, Framer, GitHub, Docker, Linux
- **Awards & Certifications:** Award for most accessible design - PDS 2026, Award for Aspirations in Computing (AiC) - NCWIT, 2023, CPR Certified - Perri-Med, May 2025
